Select ► Install ► Complete

Start Immediately with your own integration project

Your base machine will be completely pre-assembled.
All mechanical components are installed and tested prior to delivery.

Our experience is your advantage

- **Proven**
Thousands of machines installed and in operation worldwide
- **Exceptional Performance**
Up to 140 cycles per minute
- **Perfect Synchronization**
All components are driven from one central drive
- **High Precision**
Optimum work performance with individual cam sequences for each motion
- **Reduced Time to Market**
Shorten your design time with standard components
- **Completely Modular**
Simple and logical set-up. Exchange units with only 4bolts!
No adjustment necessary.
- **Easy Product Change**
Simple changeover or modifications for existing machines
- **Recyclable**
Reuse components for building new machines
- **Extensive Selection of Peripheral Devices**
OKU Feeding Technology provides custom solutions for parts feeding, handling and bulk storage.

OKUMAT

The Ultimate Assembly Machine
